25X1

1. The ZATEC-South airfield (N 51/F 10) (location see annex) was observed from all sides. It was unoccupied. It is bordered by roads on the north and west, its other boundaries being marked by sign boards. The level field is located on elevated terrain. A spur truck is not available. Two field paths lead to the field. According to local residents, it has existed since 1938 and is only occasionally used as a civil airfield. Its maximum dimension is 4,600 feet. Taxiways or runways are not available.
2. Building materials were stored near the half-finished hangars. A white "T" encircled by white wooden tiles had been laid out on the ground north of this hangar. The guardhouse was marked by the inscription "velitelstvi Stanice SNB ZATEC"; it was locked and unoccupied.

Comment:

This is the first information on the ZATEC-South airfield. All previously received reports referred to the ZATEC-North field.

1 Annex: Airfield of ZATEC-South.
